Overview

Northstar Care for Children, under chapter 142A, provides foster care benefits and kinship and adoption assistance payments. Foster care benefits are determined based on age (basic monthly rate) and supplemental need (difficulty of care supplemental monthly rate), assessed under a standardized system. If a child enters permanency through adoption or a kinship (transfer of permanent legal and physical custody to a relative) placement and meets statutory eligibility requirements, the child and family receive adoption or kinship assistance payments. Children entering permanency status under the age of six receive assistance under the alternate preschool entry rate, which is half of the amount the child would be eligible to receive under foster care assistance.

This bill increases the alternate preschool entry rate for children under the age of six to the full amount the child would be eligible to receive under foster care assistance, for children in the care of a relative or placed under the placement preferences of the Minnesota Indian Family Preservation Act (MIFPA). The bill also makes corresponding changes in sections related to state funding.
